

DIVYANSH MEENA

+91-9770638978 | divyanshmeena5285@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

Professional Summary

Results-driven Final-Year Computer Science student (B.Tech) with hands-on expertise in Full-Stack Web Development (MERN) and Machine Learning. Proven track record of engineering scalable web applications, RESTful APIs, and AI-powered solutions through industry internships. Adept at algorithmic problem-solving with 200+ LeetCode DSA challenges completed. Passionate about Backend Architecture, NLP applications, and Software Engineering.

Technical Skills

- **Programming Languages:** C, C++, Python, JavaScript (ES6+), SQL, HTML5, CSS3
- **Frontend Technologies:** React.js, Tailwind CSS
- **Backend Technologies:** Node.js, Express.js, RESTful APIs, JWT Authentication
- **Databases & Cloud:** MongoDB (Atlas), MySQL, AWS
- **Developer Tools:** Git, GitHub, Docker, Postman, Vercel, Render
- **Core CS Concepts:** Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks

Projects

AI-Powered Smart Placement Portal | *MERN Stack, Google Gemini API* **July 2026 – August 2026**
GitHub Repository

- Engineered a full-stack placement platform utilizing React.js, Node.js, and MongoDB, integrating an ATS resume analyzer and a GPT-powered interview chatbot to streamline recruitment.
- Implemented secure JWT authentication and Role-Based Access Control (RBAC), automating email workflows with Nodemailer to reduce application processing time by 60%.
- Integrated the Google Gemini API for real-time skill gap analysis, deploying a custom matching algorithm to accurately align student competencies with industry job requirements.
- Engineered an advanced search and filtering mechanism utilizing MongoDB aggregation pipelines, allowing students to efficiently query jobs by specific criteria and improving overall query response time by 35%.

QuickBill Invoice Generator | *MERN Stack, Puppeteer, REST API* **June 2026**
GitHub Repository | Live Demo

- Developed a production-ready SaaS application delivering dynamic invoice generation, real-time tax calculations, and automated server-side PDF rendering via Puppeteer.
- Configured scalable RESTful APIs and optimized database queries, securely deploying the backend on Render and frontend on Vercel with strict CORS and environment variable security.
- Designed a responsive, mobile-first UI leveraging React Router and Tailwind CSS, significantly improving client-side navigation speed and overall user experience.

Incorporated comprehensive global state management utilizing Redux Toolkit, ensuring seamless data synchronization across invoice components and reducing redundant API calls by 40%.

Professional Experience

Machine Learning Intern | *Ambitious Technology, Delhi* **June 2025 – July 2025**

- Architected an AI-driven Smart Resume Screening System utilizing Python, Flask, and Scikit-learn, effectively automating candidate shortlisting and reducing manual review time.
- Engineered robust data preprocessing pipelines, performed feature engineering, and evaluated machine learning models to enhance prediction accuracy for candidate-job alignment.
- Built a Natural Language Processing (NLP) parser to systematically extract and categorize candidate skills, education, and project experience from unstructured text.
- Implemented advanced candidate-job matching algorithms using similarity scoring and collaborated in an Agile environment to optimize model inference speed for deployment.

Education

B.Tech in Computer Science and Engineering | *Jaypee University of Engineering, Guna* **2023 – 2027**

XII (CBSE) | *Magadham International School, Vidisha* **2022 – 2023**

X (CBSE) | *Vatsalya Sr. Sec. School, Vidisha* **2020 – 2021**

Certifications & Achievements

- **Algorithmic Problem Solving:** Solved 200+ Data Structures and Algorithms problems on LeetCode and Geeks-forGeeks.
- **Software Engineering Virtual Experience:** Deloitte Technology Job Simulation via Forage (July 2025).
- **Frontend Development Certifications:** Infosys Springboard – ReactJS (April 2026) & HTML/CSS3 Advanced (September 2024).
- **Full Stack Development Certification:** Edulite Solutions (May 2026 – July 2026).
